A M S

FIELD OFFICE LISTING

U.S. DEPARTMENT OF AGRICULTURE
AGRICULTURAL MARKETING SERVICE
WASHINGTON, D.C. 20250

A Field Office
The office must

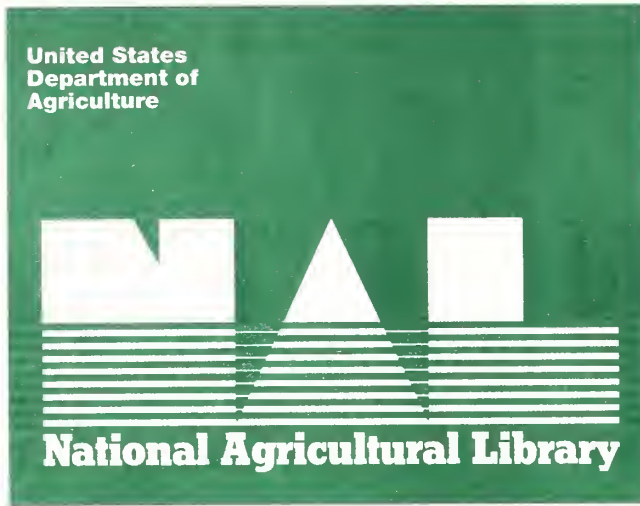

1 Serve
unit.

2 Have
basis. These
AMS activities

a

b

c

3 Be housed in quarters which are Federally owned, Federally leased, or utilized under cooperative agreement or memorandum of understanding.

NOTE: The term "Field Office" as defined above does not include:

a Duty stations or other worksites at facilities not under AMS control as to their establishment, closure, or location even though office space or other work quarters may be utilized for official purposes. Typical of those not defined as field offices are duty stations in non-Government facilities at:

Commodity Markets

Plants - eviscerating, slaughtering, packing, freezing, drying, processing, and others

Storage Elevators

Rail and Ship Terminals

Warehouses

Employees' Homes

b Non-Federal offices serving as temporary or seasonal work locations under cooperative arrangement for AMS employees whose permanent duty stations are elsewhere.

B Field Location. A "Field Location" is a city or town at which one or more AMS field offices or duty stations is located. "Field Location" therefore will include all points excluded from the Field Office definition as well as those included. In this way every place where an employee of AMS is stationed on a full- or part-time basis will be counted as a "Field Location."

PROVIDING CHANGES OR CORRECTIONS

This listing of AMS Field Offices is current through May 31, 1972. Report any changes or corrections to:

Deputy Director
Administrative Services Division, AMS
U. S. Dept. of Agriculture
Washington, DC 20250

ing criteria.

1. The first part of the paper is devoted to the study of the

properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x f(t) dt$$

It is shown that the function $f(x)$ is continuous and differentiable on the interval $[0, 1]$.

2. In the second part of the paper, we consider the problem of the existence and uniqueness of the solution of the boundary value problem

$$f(x) = \int_0^x f(t) dt, \quad f(1) = 1$$

It is shown that the problem has a unique solution.

3. In the third part of the paper, we consider the problem of the existence and uniqueness of the solution of the boundary value problem

$$f(x) = \int_0^x f(t) dt, \quad f(1) = 1, \quad f(0) = 0$$

It is shown that the problem has a unique solution.

4. In the fourth part of the paper, we consider the problem of the existence and uniqueness of the solution of the boundary value problem

$$f(x) = \int_0^x f(t) dt, \quad f(1) = 1, \quad f(0) = 0, \quad f'(0) = 1$$

It is shown that the problem has a unique solution.

5. In the fifth part of the paper, we consider the problem of the existence and uniqueness of the solution of the boundary value problem

$$f(x) = \int_0^x f(t) dt, \quad f(1) = 1, \quad f(0) = 0, \quad f'(0) = 1, \quad f''(0) = 1$$

It is shown that the problem has a unique solution.

6. In the sixth part of the paper, we consider the problem of the existence and uniqueness of the solution of the boundary value problem

$$f(x) = \int_0^x f(t) dt, \quad f(1) = 1, \quad f(0) = 0, \quad f'(0) = 1, \quad f''(0) = 1, \quad f'''(0) = 1$$

It is shown that the problem has a unique solution.

7. In the seventh part of the paper, we consider the problem of the existence and uniqueness of the solution of the boundary value problem

$$f(x) = \int_0^x f(t) dt, \quad f(1) = 1, \quad f(0) = 0, \quad f'(0) = 1, \quad f''(0) = 1, \quad f'''(0) = 1, \quad f^{(4)}(0) = 1$$

It is shown that the problem has a unique solution.

8. In the eighth part of the paper, we consider the problem of the existence and uniqueness of the solution of the boundary value problem

$$f(x) = \int_0^x f(t) dt, \quad f(1) = 1, \quad f(0) = 0, \quad f'(0) = 1, \quad f''(0) = 1, \quad f'''(0) = 1, \quad f^{(4)}(0) = 1, \quad f^{(5)}(0) = 1$$

It is shown that the problem has a unique solution.

9. In the ninth part of the paper, we consider the problem of the existence and uniqueness of the solution of the boundary value problem

$$f(x) = \int_0^x f(t) dt, \quad f(1) = 1, \quad f(0) = 0, \quad f'(0) = 1, \quad f''(0) = 1, \quad f'''(0) = 1, \quad f^{(4)}(0) = 1, \quad f^{(5)}(0) = 1, \quad f^{(6)}(0) = 1$$

It is shown that the problem has a unique solution.

10. In the tenth part of the paper, we consider the problem of the existence and uniqueness of the solution of the boundary value problem
